

# Waste Tracking

## DESCRIPTION

Visser offers an integrated and fully managed Waste Tracking Service to ensure compliance to *ERCB Directive 58*. These requirements include ERCB annual waste disposition reports to the regulators as required.

The Visser “Cradle to Grave” solution to waste tracking compliance is a complete managed service that ensures compliance in all areas. Along with monthly Waste Tracking Services, Visser also provides annual summary reports and annual waste disposition reports to the ERCB through the DDS system on behalf of your company.

## SERVICE ADVANTAGES

- Full service compliance to meet all waste tracking requirements
- Annual waste disposition reports are included in the monthly service
- All tracking discrepancies are corrected prior to being entered into the waste tracking system
- Having a 3rd party company completing tracking services ensures that ALL wastes are being tracked, not just one waste receiver
- Over 13 years of waste tracking experience
- Visser stores all waste documentation for 2 years

## KEY COMPONENTS

- Profiling clients for our database
- Gathering waste information
- Proper coding and clarifying any discrepancies to existing manifests

- Ensuring all inconsistent data on waste tracking information is verified prior to entering it into our tracking database
- Data entry
- Generating annual waste summary reports for your company
- Submission of the waste disposition report to the ERCB through the DDS system
- Storage of waste manifests for 2 years
- Training for corporate or field employees

## PROGRAM DELIVERABLES

- Assist client in gathering waste information
- Set up lines of communication with field operations to ensure that all waste documentation is received
- Contact all waste receivers annually to ensure all waste documentation has been received
- Provide waste reports upon request
- Provide annual waste tracking reports
- Complete annual waste DDS Submissions
- Provide waste training to clients to reduce the number of waste tracking, handling and manifesting errors
- Propose proper waste handling initiatives as part of a corporate Waste Management Plan
